

# Climate FieldView™ Setup Guide

## MapAnything for Pull-Type Liquid and Anhydrous Applicators

### Theory of operation:

- Using GPS position information, the GPS receiver offsets, and manually entered application rates, the FieldView™ Cab app will generate application maps, that can be used for performance comparisons during or after the growing season.

### Pull-Type Applicator Electronics terms:

General Information: The information used in this setup guide was current at the time of printing. However, due to ongoing product improvements, production changes may cause your FieldView™ Cab App screens to appear or operate slightly different in detail. The Climate Corporation reserves the right to change specifications or design without notice and without incurring obligation.

## General Setup Sequence

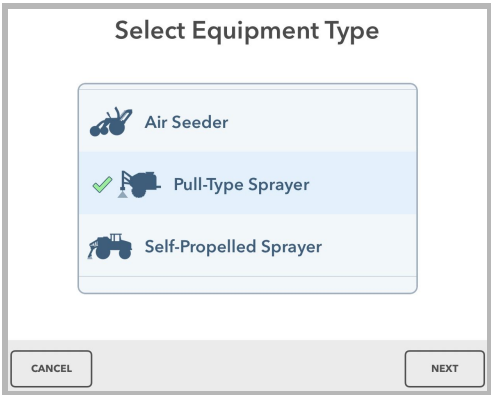

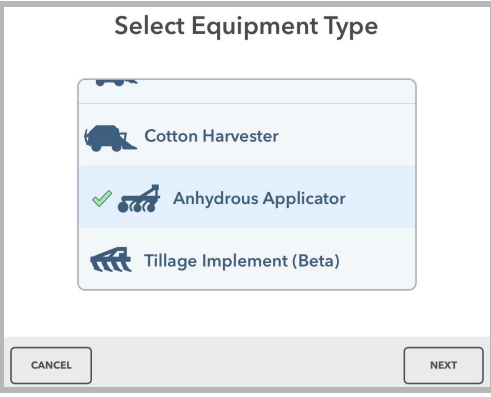

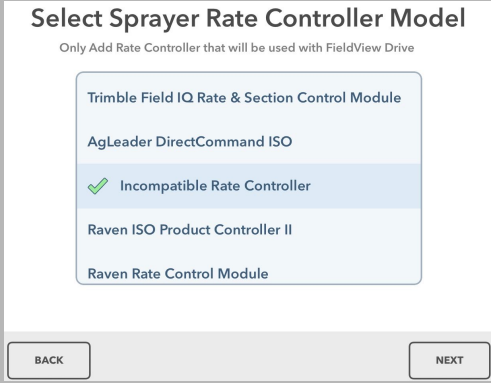

### Step 1. Install FieldView™ Drive in the Tractor

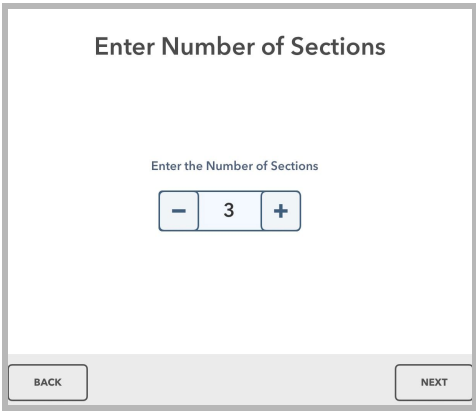

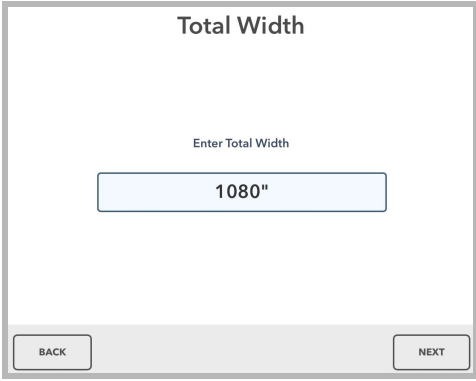

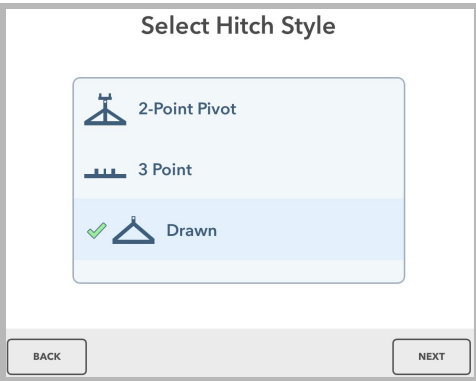

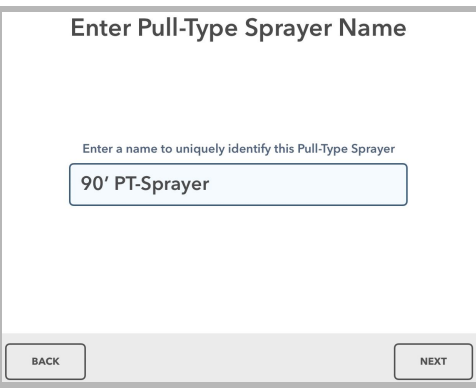

Depending on the display, GPS, and tractor and implement wiring, a FieldView™ Drive adapter harness kit may or may not be required. See the **MapAnything Adapter Kit** section of the [FieldView™ Drive Machine Compatibility guide](#) for these details.

### Step 2. Setup Pull-Type Sprayer or Anhydrous Applicator in the FieldView™ Cab App

Go to the FieldView™ Cab app Home Screen >>Click **Equipment** >> **+Add New Equipment**

*A pull-type sprayer with an Incompatible rate controller is set up in the example below*

 <p>The screenshot shows a 'Select Equipment Type' dialog box with three options: 'Air Seeder', 'Pull-Type Sprayer' (which is highlighted with a blue background and a green checkmark), and 'Self-Propelled Sprayer'. At the bottom are 'CANCEL' and 'NEXT' buttons.</p>	<p><b>1. Select Pull-Type Sprayer or Select Anhydrous Applicator Equipment Type</b></p>
 <p>The screenshot shows a 'Select Equipment Type' dialog box with three options: 'Cotton Harvester', 'Anhydrous Applicator' (which is highlighted with a blue background and a green checkmark), and 'Tillage Implement (Beta)'. At the bottom are 'CANCEL' and 'NEXT' buttons.</p>	<p>The remaining setup steps are the same</p>
 <p>The screenshot shows a 'Select Sprayer Rate Controller Model' dialog box with the subtitle 'Only Add Rate Controller that will be used with FieldView Drive'. It lists five options: 'Trimble Field IQ Rate &amp; Section Control Module', 'AgLeader DirectCommand ISO', 'Incompatible Rate Controller' (highlighted with a blue background and a green checkmark), 'Raven ISO Product Controller II', and 'Raven Rate Control Module'. At the bottom are 'BACK' and 'NEXT' buttons.</p>	<p><b>2. Select Rate Controller</b> &gt;&gt;Incompatible Rate Controller</p>

	<p><b>3. Enter Number of Boom Sections</b>  &gt;&gt;3 is entered in this example, but enter the number from your sprayer.</p>
	<p><b>4. Enter Total Boom Width</b>  &gt;&gt;1080" (90') is entered in this example, but enter the number from your sprayer.</p>
	<p><b>5. Select Hitch Style</b>  &gt;&gt;Drawn is selected in this example</p>
	<p><b>6. Enter any name for the pull-type sprayer</b></p>

## 7. Pull-Type Sprayer Modal >> GPS Offsets Pane >> Enter GPS Offsets

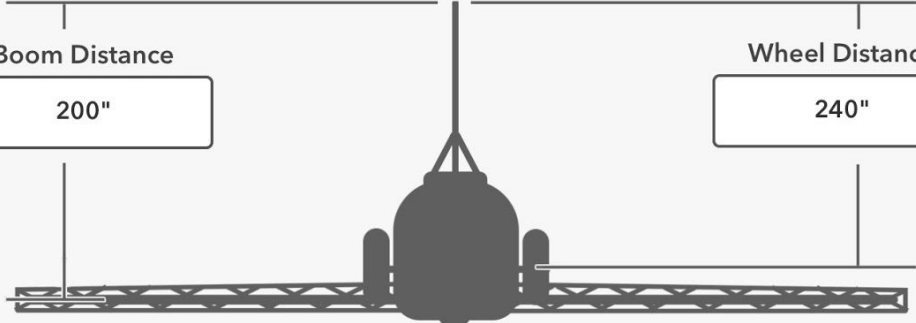

### Setup Pull-Type Sprayer

#### 90' PT-Sprayer

Incompatible controlled 3 Section Pull-Type Sprayer, 90' wide

EDIT

GPS Offsets	Hitch Style	Start Delay	Stop Delay
Section Setup	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">Drawn <span style="font-size: small;">▼</span></div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">0.5</div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">0.5</div>

The diagram shows a top-down view of a pull-type sprayer. A central tank is connected to a horizontal boom. Two wheels are positioned on the boom. The distance from the tank to the left wheel is labeled 'Boom Distance' with a value of 200". The distance from the tank to the right wheel is labeled 'Wheel Distance' with a value of 240".

REMOVE PULL-TYPE SPRAYER

DONE

## 8. Pull-Type Sprayer Modal >> Section Setup Pane

If each boom section width is equal, select **Yes** under **Even Section Widths**

If each boom section width is not equal, select **No** under **Even Section Widths**. Then enter each section width.

### Setup Pull-Type Sprayer

#### 90' PT-Sprayer

Incompatible controlled 3 Section Pull-Type Sprayer, 90' wide

EDIT

GPS Offsets	Sections	Total Width	Even Section Widths
Section Setup	<div style="display: flex; align-items: center; gap: 5px;"> <span style="border: 1px solid gray; padding: 2px 5px;">-</span> <div style="border: 1px solid gray; padding: 2px 5px;">3</div> <span style="border: 1px solid gray; padding: 2px 5px;">+</span> </div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">1080"</div>	<div style="display: flex; gap: 5px;"> <div style="border: 1px solid gray; padding: 2px 5px;">YES</div> <div style="border: 1px solid gray; padding: 2px 5px; background-color: #333; color: white;">NO</div> </div>

REMOVE PULL-TYPE SPRAYER

DONE

### Setup Pull-Type Sprayer

#### 90' PT-Sprayer

Incompatible controlled 3 Section Pull-Type Sprayer, 90' wide

EDIT

GPS Offsets	Sections	Total Width	Even Section Widths
Section Setup	<div style="display: flex; align-items: center; gap: 5px;"> <span style="border: 1px solid gray; padding: 2px 5px;">-</span> <div style="border: 1px solid gray; padding: 2px 5px;">3</div> <span style="border: 1px solid gray; padding: 2px 5px;">+</span> </div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">1080"</div>	<div style="display: flex; gap: 5px;"> <div style="border: 1px solid gray; padding: 2px 5px; background-color: #333; color: white;">YES</div> <div style="border: 1px solid gray; padding: 2px 5px;">NO</div> </div>
	<div style="border: 1px solid gray; padding: 5px; display: inline-block; font-size: small;">Section Width 1</div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block; font-size: small;">Section Width 2</div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block; font-size: small;">Section Width 3</div>
	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">468"</div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">144"</div>	<div style="border: 1px solid gray; padding: 5px; display: inline-block;">468"</div>

REMOVE PULL-TYPE SPRAYER

DONE

### Step 3. Connect FieldView™ Drive and FieldView™ Cab app

Open iPad® device Settings >> Bluetooth >> Click **Connect**, when the iPad detects the FieldView™ Drive.

If prompted  
>>Click **Pair**

Open FieldView™ Cab App >> Go to Settings >> Devices >> Click **Tap to Connect**.

A **green checkmark** will appear next to the Drive name once connected.

### Step 4. Activate Pull-Type Sprayer and Tractor

When prompted, set the sprayer active, then the tractor, by pressing **Set Active** for each

If a different implement is active  
>>Click **Yes** when prompted

A **green checkmark** will appear next to the activated equipment name.

## Step 5. Select Field and Activate

Go to Maps >> click **Select Field** >> select the field to activate.

FIELD	FARM	CLIENT	DATE
Dad's 90 86.1 Acres	Bowman's Be...	JRS Farms	(No Date)

+ ADD NEW FIELD

When prompted to Change Active Field >> Click **Yes**.

**Change Active Field?**  
Do you wish to make the field Dad's 90 active?

No Yes

## Step 6. Select Application

1. Tap to Enter Application

2. Tap to Select Application

If applying anhydrous the application will default to "anhydrous ammonia"

3. Select or Add an Application

Tip: Applications mixes can be pre-made within the **Settings** >> **Applications** modal

## Step 7. Start Application

Press the **Tap to Start** button to start mapping. The coverage will start after movement begins.

Tip: It is best to create the field boundaries ahead of time. If the operator forgets to press the **Tap to Stop** button, mapping will stop when the planter is 50 feet outside of the boundary.

Press the **Tap to Stop** button to stop mapping.
